

Hizbollah areas of military, logistical, and command infrastructure hit in Beirut as of 21.7.2006

Areas damaged in the fighting are shown in grey

Weapons transport runways and some fuel storage

Hizbollah terrorist command and control and weapons storage

For size comparison, this is the Beirut race track

BBC World TV has broadcast a distorted image of building damage, which is in fact confined to a very small area of Beirut, only those areas of Hizbollah terror, command, military, and logistics for weapons transport.

BBC broadcasts intentionally distort, so that the idea is conveyed that the entire city has been destroyed. When in fact 99% has not been touched.

In fact, only Hizbollah command and weapons centers and transport of weapons sites have been attacked. Less than 1% of the entire city.
