

LIST OF POSTERS

ENERGY SCIENCE AND TECHNOLOGY

- P-ES-01 Improving the Performance of CdS Sensitized Solar Cell**
M. Shalom, BIU
- P-ES-02 Recombination Inhibiting Barrier Layer For Type II Dye Sensitized Solar Cell**
I. Hod, BIU
- P-ES-03 High Efficiency Low Cost Photovoltaics Based on Tandem Dye-Sensitized Solar Cells**
M. Adler, BIU
- P-ES-04 Vertical Junction Photovoltaic Cells for Concentrated PV**
G. Segev, TAU
- P-ES-05 Nanostructured Vanadium Oxide Films in Silicon Solar Cells**
G. Golan, HIT
- P-ES-06 Preparation and Characterization of Nb-doped SrTiO₃ Thin Film Electrodes**
T. Cohn, Technion
- P-ES-07 Fe₂O₃ Thin Film Photoelectrodes for Water Splitting**
E. Sharlin, Technion
- P-ES-08 Solar Driven High Temperature Electrolysis of CO₂**
Y. Alioshin, WIS

NANOMATERIALS

- P-NM-01 Electrochemical and Biological Performance of Composite Film of Polyaniline and Single Walled Carbon Nanotubes**
A. Zeng, HUJI
- P-NM-02 The Effect of Sb on the Morphology of Chemical Bath Deposited Zinc Oxide Films**
N. Kedem, WIS
- P-NM-03 Transport Properties of the Rhenium-Doped IF-MoS₂**
L. Yadgarov, WIS
- P-NM-04 Patterned Bundles of Bioinspired Peptide Nanotubes By Bottom-up Technology**
J. Shklovsky, TAU
- P-NM-05 Scanning Tunneling Microscopy Measurements of Magnetoresistive Telegraph Noise in Magnetite Nanocrystal Assemblies**
E. Tirosh, TAU
- P-NM-06 Cathodoluminescence Studies of Zn_xCd_{1-x}Se/C Core/Shell Nanocrystals**
Y. Estrin, BGU

- P-NM-07 The Effect of Inorganic Nanoparticles on the Properties of Nano Composites Based on Epoxy Resins**
E. Zohar, SED
- P-NM-08 The Chemisorption of Oxygen on Metal Oxide Surfaces: Large and Nano Scale Grains**
G. Ankonina, Technion
- P-NM-09 Surface Functionalization of WS₂ Fullerene-Like Nanoparticles**
C. Shahar, WIS
- P-NM-10 Self-Assembled FtsZ Filaments as a Novel Nano-Molecular Scaffold**
A. Shusterovitch, TAU
- P-NM-11 Core-Shell Inorganic Nanotubes from Capillary Wetting**
R. Kreizman, WIS
- P-NM-12 Synthesis and Characterization of Hollow Vanadium Pentoxide Nanoparticles Obtained by Pulsed Laser Ablation**
R. Levi, WIS
- P-NM-13 Engineering of Advanced Hybrid Photovoltaic Devices Implementing Photosynthetic Protein Complexes**
L. Kraversky, TAU
- P-NM-14 Gold Mineralization Using Dual Binding Peptide Template**
M. Matmor, BGU
- P-NM-15 Characterization, Controlled Assembly and Patterning of Aromatic Dipeptides Nanostructures**
L. A. Abramovich, TAU
- P-NM-16 Transparent Metal Nanowire Thin-Films by Solution Deposition**
H. Gilon, TAU
- P-NM-17 Enzyme/Neurotransmitter Interactions in Nanopores of Entangled Polymer Network**
E. Vaganova, HUJI
- P-NM-18 TEM Study of the Structural Properties of Re-doped MoS₂ Inorganic Fullerene-like Nanoparticles**
M. Weidenbach, Institute of Solid State Research, Jülich, Germany
- P-NM-19 Formation, Thermal and Mechanical Properties of Poly(Vinyl Alcohol)/Clay Multilayer Films Using Layer-By-Layer (LBL) Assembly**
T. Umasankar Patro, WIS
- P-NM-20 Drawing with Nanotubes: Nanotube-Templated Synthesis of Nanowires with Complex Geometries**
T. S. Yarden, WIS
- P-NM-21 Ordered VS. Random Self-Organized Carbon Nanotube Serpentine on Crystalline and Amorphous Surfaces**
N. Shadmi, WIS
- P-NM-22 Is It Possible to Image Single Au Atoms in GaAs Nanowires by HRSTEM?**
M. Bar Sadan, Institute of Solid State Research, Jülich, Germany

- P-NM-23** **Polymeric Micro Technologies for MEMS and Biochip Applications**
R.O. Almog, TAU
- P-NM-24** **Proteins as Bio-electronic Materials: Electron Transport through Solid-State, Protein Monolayer Junctions**
I. Ron, WIS
- P-NM-25** **Excitation Dependence of GaN/AlN Quantum Dots With Uniaxial Stress**
O. Moshe, BGU
- P-NM-26** **EXAFS Study of Local Distortions in the Fluorite Lattice of Ce_{0.8}Gd_{0.2}O_{1.9}**
A. Kossoy, WIS
- P-NM-27** **Control of Defects and Magnetic Properties in Colloidal MgO Particles**
B. M. Maoz, TAU
- P-NM-28** **Correlation between Interfacial Molecular Structure and Mechanics in CNT/epoxy Nanocomposites**
N. Lachman, WIS
- P-NM-29** **Magneto lithography- Nano Scale Patterning Using Hard Disc as a Mask**
A. K. Tatikonda, WIS

SENSORS

- P-SE-01** **Chemical Sensors Based on Hexa-peri-hexabenzocoronene (HBC) Discotic Molecules**
Y. Zilberman, Technion
- P-SE-02** **Spectroscopic and Electrochemical Study of Hybrid Materials of Conducting Polymers and Carbon Nanotubes**
L. Reiss, HUJI
- P-SE-03** **Electrical Monitoring of Enzymatic Phosphorylation-Dephosphorylation Reactions on Solid Substrates**
E. Snir, HUJI
- P-SE-04** **Electrostatic Properties of Silane Monolayers in an Electrolytic Environment**
E. Halpern, TAU
- P-SE -05** **Thermal Discrimination in Affinity Biosensors: Limits of Performance**
M. Horesh, TAU
- P-SE-06** **An Integrated Dual-Method Amperometric Biosensing For Colon Cancer Detection**
S. Vernick, TAU
- P-SE-07** **Tracing the Mechanism of Molecular Gated Transistor in Wet Environment**
B. Khamaisi, TAU
- P-SE-08** **Antibody Nano-Array Using Nano Fountain Pen**
I. Tsarfati, BGU
- P-SE-09** **Nano Scale Organic Layers Integrated In Electrolyte/Insulator/Semiconductor Sensors For Immunological Detection**
H. Einati, TAU

- P-SE-10** **Detection of Biochips by Raman Spectroscopy**
K. Kantarovich, BGU
- P-SE-11** **Polyaniline-Coated Single-Walled Carbon Nanotubes: Synthesis, Characterization and Impact on Primary Immune Cells**
S. Ben-Valid, HUJI
- P-SE-12** **Using self-assembled monolayer in whole-cell bioluminescent Biosensor**
H. Weinrib, HUJI
- P-SE-13** **Fast Classification of Pathological Processes in Peritoneal Dialysis Patients Based on Blood Samples**
D. Prilutsky, BGU
- P-SE-14** **Flow-through Real Time Bacterial Biosensor for Toxic Compounds in Water**
E. Eltzov, BGU

SURFACES

- P-SU-01** **Porous Silicon: Desorption Kinetics and Unusual Photochemistry**
G. Toker, HUJI
- P-SU-02** **Modification of Adhesion Properties By Electron Irradiation**
I. Torchinsky, TAU
- P-SU-03** **The Effect of Tungsten Sulfide Fullerene-Like Nanoparticles on The Toughness of Epoxy Resins**
M. Shneider, SCED
- P-SU-04** **Field Effect of Real (non-ideal) Polar Self-Assembled Monolayers in Molecular Gated Transistors**
O. Shaya, TAU
- P-SU-05** **The Interaction of O₂ with the Surface of Polycrystalline Gadolinium at the Temperature Range 300-670 K**
S. Cohen, BGU
- P-SU-06** **Si-C Bound Alkyls on Oxide-Free Si: Preparation of Electronic Transport Quality Monolayers from Solution**
A. Lavi, WIS
- P-SU-07** **Low Temperature Atomic Hydrogen Cleaning (LT-AHC) of InSb Substrates for Molecular Beam Epitaxial (MBE) Growth**
O. Klin, SCD
- P-SU-08** **Resistivity and Morphology of Laser Patterned Metal Wires**
O. Stein, HUJI
- P-SU-09** **Solid Nanopore for High Throughput DNA Sequencing**
K. Liu, HUJI
- P-SU-10** **Improving the Performance of MOSFET's through their Exposure to Hydrogen Radicals/Inert Gas Plasma Mixture**
H. Aharoni, BGU

- P-SU-11 The Growth of Polyoxide Thin Films at 400°C by Oxygen Radicals**
H. Aharoni, BGU
- P-SU-12 Growth of Thin Microcrystalline and Amorphous Films for Tandem Solar Cells at Low Temperature by Radical Based Process within a Single Chamber Plasma System**
H. Aharoni, BGU
- P-SU-13 Electrically Tunable Diffraction Gratings in the g44 Configuration**
N. Elfassy, HUJI
- P-SU-14 Selective Etching and Oxidation of CVD Diamond Films**
Z. Shpilman, Technion
- P-SU-15 Chemical Composition, Thermal stability and Hydrogen Plasma Treatment of laser Cut Single Crystal Diamond Surface Studied by X-ray Photoelectron Spectroscopy and Atomic Force Microscopy**
A. Gaisinskaya, Technion
- P-SU-16 Metal Contact Deposition onto Organic Molecular Monolayers: How can we Detect Metal Penetration?**
H. Shpaisman, WIS
- P-SU-17 Tribological and Adhesion Properties of CVD Diamond Films Grown on Steel with a Cr-N Interlayer**
A. Laikhtman, HIT

INDUSTRY-ACADEMIA

- P-IA-01 Fabrication of Flexible Microelectrodes Using Cold HV Sputtering**
O. Berkh, TAU
- P-IA-02 Magneto-Lithography (ML), a Simple and Inexpensive Method for High-Throughput, High-Resolution Surface Patterning**
A. Bardea, WIS
- P-IA-03 All-Optical Fiber-Integrated Silicon based Modulator**
R. Aharoni, BIU
