Welcome Message

Dear Colleagues,

As part of the activities of the Israeli section of IEEE, we will be holding our 30th biennial convention in Eilat during December 12-14, 2018. Since the last conference we are using the name "The International Conference on the Science of Electrical Engineering" (ICSEE), in order to better reflect our commitment to contributing to and keeping abreast of the latest developments in the science and technology of electrical engineering.

The 2018 convention will feature over 200 presentations in a wide spectrum of disciplines such as signal processing, control theory, circuits and systems, energy, power electronics, computers, communications, antennas, and electro-optics. We therefore expect the convention to be conducive to the exchange of knowledge and ideas between different areas, thereby serving to advance each of the individual disciplines.

This year we are proud to introduce special full-day symposia that will complement the traditional sessions and will include longer and more detailed talks on specific subject areas. Many internationally renowned keynote and invited speakers will present their work and talk about their views on their respective branches of science. The three symposia that will take place this year will be on the topics of Optoelectronics, Deep learning, and Circuits and systems. In addition to the symposia, the conference will also feature several special sessions on a variety of topics, with the participation of key researchers from around the globe.

I would like to use this opportunity to express my deepest gratitude to the many individuals who have been contributing much of their time to the organization and planning of this convention. I am in particular indebted to Dr. Yuval Beck, the secretary of the IEEE Israel Section, Dr. Anelia Somekh-Baruch, the program chair, and to the organizers of the symposia and special sessions. The conference would not have been possible without their dedication. I would also like to thank the authors, the session chairs, and all those who have invested efforts into ensuring the success of this convention.

Respectfully yours,

Prof. Uri Shaked

Chair of the Israel IEEE Section
