November 10, 1988

Dr. Israel Hanukoglu,
Department of Hormone Research,
The Weizmann Institute of Science,
REHOVOT.

Dear Dr. Hanukoglu,

It is a great pleasure for me to inform you of your being nominated as the first winner of the Hans Lindner Memorial Prize for excellent scientific achievements in the field of Biochemical Endocrinology. The Prize, a sum of \$1,000.- donated by Mr. Peter and Mrs. Carola Kleeman of London, is awarded to you for your pioneering studies on the cloning of the enzyme, adrenodoxin reductase of mitochondrial cytochrome P450 and for the first identification of a consensus amino acid sequence of NADP dinucleotide fold.

On this occasion, let me wish you much success in your future research. As the Prize winner of this year, I also wish to invite you to deliver a lecture on this subject at the forthcoming Annual Meeting of the Israel Endocrine Society to be held in Jerusalem on January 16-17, 1989.

Sincerely yours,

Yitzhak Koch, Ph.D.
President
